Are you ready for the questions?

**Nathaniel Receda**20:17

yis

**Eric Mikulin**20:17

So, What kind of online services do you use?

**Nathaniel Receda**20:18

I play a lot of online video games, right now that means I use Steam and League of Legends a lot 😊

**Eric Mikulin**20:18

Read the current proposal and tell me, does the current design plan fit your needs so far?

 **DesignPlan.zip**

**Nathaniel Receda**20:19

This looks pretty good, but I want to be able to add or remove services as I use them. I don't want unused programs to clutter the product.

**Eric Mikulin**20:20

Alright, noted. Next, do you feel the product needs cloud integration?

**Nathaniel Receda**20:20

No. I feel that the product would not benefit my needs in any way if it were a cloud based application.

**Eric Mikulin**20:20

Alright, last question: Would you create mods for the program? And/or would you modify the program?

Nathaniel Receda

20:21

I wouldn't create mods, but if I could download mods for the program to add additional program compatibility I would.

Eric Mikulin

20:21

Sweet, thanks!

Nathaniel Receda

20:21

No problem 😊

Eric Mikulin

22:07

Okay, I have the program completed, test it out, feel free to ask questions. When you are done tell me if you need any changes or improvements done.

TheProduct.zip

Nathaniel Receda

22:07

OKay, how do I run it?

Eric Mikulin

22:08

Go to command line any type in "python main.py", the final version will be an .exe or .app that you can run

Nathaniel Receda

22:08

Hold on

Eric Mikulin

22:09

Everything good?

Nathaniel Receda

22:09

yeap

but how do I filter the services?

Eric Mikulin

22:09

Oh, you just click on the large image icons on the left sidebar

Nathaniel Receda

22:09

kk thanks

Nathaniel Receda

22:11

Looks good! The main window GUI is very nice. Easy to use for sure. It only has League and Steam, but that's all I need for now. That should be changeable later right? The filters work well, but I have some issues. The options menu is a little ugly and it takes too long to set up.

Eric Mikulin

22:11

Okay thanks, I'll go fix those problems right away!
